

# NE FOR FILM AT HOUNSLOW

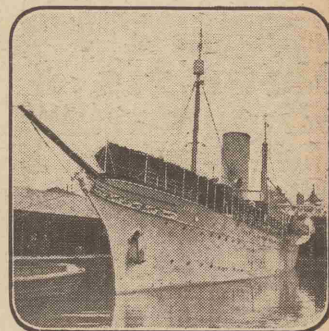

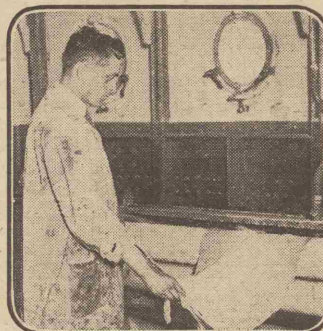

# MAKING THE SHARK USEFUL TO MAN

Dr. Ehrenreich showing his children the jaw of a tiger shark. On the left is Mr. Jenkenson, who fitted out Istar as a shark-leather factory.

Sir Albert Barratt, of Whetstone, has given £10,000 to the Prince of Wales's General Hospital N., which appeals for £50,000.

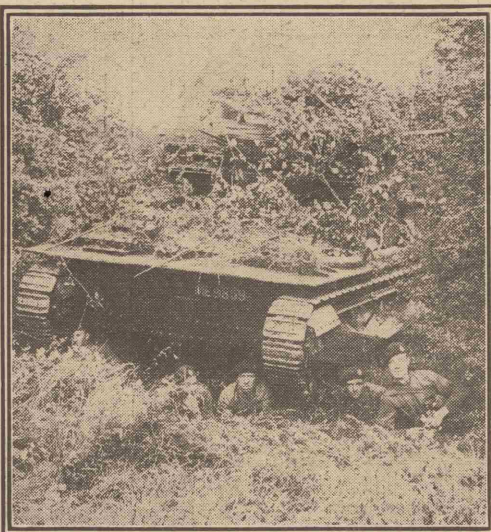

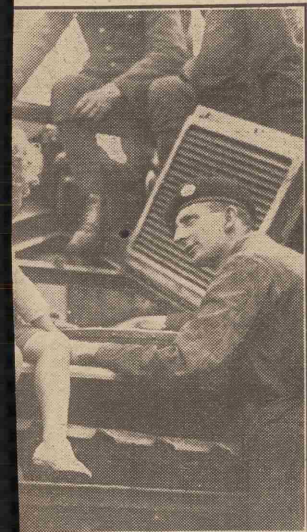

Shark skin being passed through the fleshing machine on the ship.

The s.s. Istar, the floating shark-leather factory, at East India Docks.

**HER HOME COMING.** — Miss Betty Nuthall, daughter of Richmond, sees the completion of her return from America to-day.

**JUNIOR TENNIS.**—Miss M. C. Scriven playing Miss W. M. Hill, whom she defeated in the Wimbledon junior tennis championships. The third round was reached when rain stopped play.

Enthusiast being shown over a tank.

A well-camouflaged tank waiting to go into action.

and Oxfordshire, which were continued yesterday with renewed activity and startling realism.

Major Seale with the jaw of a monster tiger shark aboard the s.s. Istar, which has been fitted out for the production of leather and other commodities from sharks. Dr. Ehrenreich claims to have discovered a process of removing shagreen—the sharp teeth which covers the shark's skin.—(Daily Mirror photographs.)
