TUESDAY'S POST.

From the LONDON GAZETTE.

St. James's, December 29.

Extract of a Letter from General Elliot, Governor of Gibraltar, to the Earl of Hillborough, one of Hit Majeffy's Principal Secreturies of State, dated Gibraltar, November 28, 1981, received December 27.

HAVE the Honour to communicate to your Lordfhip, that the uniform Appearance of the Enemy's Operations fulficiently flowing that an Attempt to form and detroy the Whole of their advanced Works, now arrived at the highest State of Perfection, after immense Labour and Expence, would probably be attended with the desired Success, it was therefore judged expedient to carry the fame into immediate Execution.

The necessary Arrangements being made, a considerable Detachment, formed in three Columns, manched from the Garrison, upon the Setting of the Moon, at Three o'Clock on the Moraing of the 2d Instant. The Columns were severally composed of an advanced Corps, a Body of Pioneers, Ar. Illery-Men carrying Combulties, a fustaining Corps, with a Referve in the Rear. The Pioneers of the Left Column were Seamen from his Majesty's Ships.

The Force of the Enemy, in their Lines and advanced Works, consisted of 50 or 60 Cavalry, and 600 Instantry, composed of the Spanish and Walloon Guards, Artillerits, Cassidores, and other Light Troops, bediese the usual Body of Workmen carrying their Arms.

The viscous Efforts of his Majesty's Troops, on every Part of the exterior Front, were irrestitable; and the Enemy, after a cattering Fire of short Duration, gave Way on all Sides, and abandoned their stupendous Works with great Precipitation.

The viscous Efforts of his Majesty's Troops, on every Part of the exterior Front, were irrestitable; and the Enemy, after a Cattering Fire of short Duration, gave Way on all Sides, and abandoned their stupendous Works with great Precipitation.

The Pioneers and Artillerits made wonderful Exertions, and spread their Fire with such amazing Rapidity, that in Hall an Hour two Mortar Batteries of ten thintended the Artax, with the

the Brilliant, and Lieutenant Muckle, of the Porcupine.

Captain Curtis, of the Brilliant, (commanding the
Squadron in the Bay) accompanied them as a Volunteer,
and greatly diffinguithed himfelf, by his Diferenment,
Affittance, and Perfonal Efforts. To the Attention and
Valour of these chief Officers, and the Steadiness of the
Troops, was owing the good Order observed throughout
the Whole.

Greater Zeal for his Majesty's Service was never shewn;
and was there ever an Enterprize more perfectly excuted.

nor was there ever an Enterprize more perfectly excuted.

Many of the Enemy were killed upon the Spot; but owing to the Darknels and other Circumitances, I am not enabled to inform your Lordfhip either of the exact Number, or their particular Quality. A Sub-Lieutenant of Grenadiers, with Rank of Captain, and feven of the Walloon Guards, with an Officer and three Artillery-Men, were taken Prifoners.

It is with extreme Pleafure that I acquaint your Lordfhip the Lofs on our Part has been inconfiderable, a Return of which is herewith inclosed.

L O N D O N, JANUARY 1.

A Peace with Holland, of which there feemed to be a throng Probability a Week or two fince, is now as diffant as ever; we hear the Emperor of Germany is averie to that Meafure, and has thrown Obfacles in the Way of it, which, for the prefent, render it utterly unattainable. The Dutch either have entered, or are about entering into, the firiderly Alliance, Offensive as well as Defensive, with the Court of Verfailles.

It is faid, the Emperor of Germany is expected to

The fatal Delays which so frequently prevent our Fleets from failing in due Time, and thereby deseat our best concerted Naval Expeditions, have at length called up the Resentance of a great and illustrious Personage. His ——, at the Levee, on Friday last, emphatically expressed his Surprize and Chagrin at Sir George Rodney's present Stutation. "When Sir George arrives in the West Indies (faid his ——) he will have little to do, but admire the superior Skill and Adroitness of my Enemies."—The Son of the Baronet was present, and appeared extremely affected.—It is not till the Wind becomes fair, and the Weather favourable, that our Fleets begin to prepare for Sea—By that Time they are ready the Wind changes, Storms arise, and they are fast locked up in Harbour.—St. James's Chronicle.

A Fleet of Observation for Channel Service, to consist of twenty-four Sail of the Line, is ordered to be got ready by the latter End of February. This Squadron will consist of all the capital Ships which each be procured.

Advice was received on Saturday from Kinslae, that a Versel was put in there from New York, the

Advice was received on Saturday from Kinfale, that a Veffel was put in there from New York, the Mafter of which fays, that when he left that Place, which was on the 25th of November, no Account had been received of the French making any Attempt 9. Barbadees, nor were they apprehenfive that they would, with the prefent Force they have, attack that Island.

Yefterday Forenoon Mr. Laurens, attended by the Deputy Governor of the Tower, waited upon the Privy Council; and, after upwards of an Hour's Examination, during which he acquitted himfelf with great Eale and Peripicuity, in antwering every Question that was put to him, was referred to Lord Manfield at his Chambers in Serjeant's Inn, where his Lordfhip attended in Perion, and admitted Mr. Laurens to Bail. It was expected this Gentleman would fet out either laft Night or this Morning for Bath, being recommended to the Waters of that Place by his Phylicians, for the Recovery of his Health. It is generally believed, that upon Mr. Laurens's Return from Bath, he will be appointed a Mediator between Great Britain and Congress; and it is faid, the most flattering Expectations of a Reconciliation between the Mother Country and her Colonies are founded upon this Gentleman's Negociation.

This Morning fome Dispatches were received at Lord George Germaine's Office from Newfoundland, by which we learn, that his Majetly's Cruifers have captured, within fix Wecks, twenty-fix Sail of American Privateers, and fent them into St. John's.

Advice is received from Newfoundland, that a Spanish armed Ship, called the N. S. Oudesarde del Pelazuolo, bound from the Havannah, with a large Number of Dollars on board, and a Quantity of Hides, is taken by the Hornet Privateer, and carried into St. John's; the is faid to be worth 16,0col.

Government are Posteffion of Dispatches from Barbadoes, dated the 15th of November, which state that all was fase at that Island, when the Express came away.

that all was fafe at that Ifland, when the Express came away.

It has been already faid that Lord Cornwallis wifhed to deliver up his Sword to the French General Contre de Rochambeau, who through Modelty would not receive it, but informed his Lordhip that the Conjunct was due to General Wafnington, and not to him: The following Facts are now mentioned in Praife of General Wafnington: — When he faw Lord Cornwallis coming towards him, for the Purpofe of giving phis Sword, he immediately met him, and faved his Lordhip the Mortification of offering his Sword, by requelting "that he would be pleafed fill to wear "that Sword, with which, on to many Occasions, "he had done himfelf fo much Honour."

We are informed, that the whole Number of Civil

"he had done himielf fo much Honour."

We are informed, that the whole Number of Civil Loyalifis with Lord Conwallis, at the Time of his Surrender on Capitulation, were fixten; that four-ten were received on board the Bonetta, and the other two (both Clergymen) being most obnoxions, were particularly refued that Indulgence by the express interposition of the American General. When the Bonetta, therefore, left the Chefapeak, it was imagined that those two unfortunate Loyalifts would be facrificed to American Orgeance, but happily a different Passion prevailed, and both the Clergymen have fince arrived at New York.

A Letter from Colonel Tarlton to his Brother, now in Inswich, mentions that he was in perfect Health in the Middle of last Month, and is daily expected in England.

in the Middle of last Month, and is daily expected in England.

Admiral Rodney's Squadron is to be augmented to twelve Sail of the Line, with which he is immediately to make the best of his Way to the West Indies, to join Admiral Hood, from whom he will take the Chief Command.

We have it from incontestible Authority, that the Weather off Ushant, and in the Bay, has been forme Time past so fromy and tempestuous, that it has been utterly impossible for any large Fleet to proceed either to the Southward or Westward. There is the greatest Reason, therefore, to imagine, that the Fleet and Convoy which Admiral Kempenselt fell in with, have (from Motives of Prudence) returned to Brest, or that the whole have been dispersed and greatly damaged.

Government have received Advice of the principal Part of Mont. Vaudrecuiles Squadron having been seen standing for Brest, very much shattered, in the late heavy Gales of Wind.

An Act of Parliament is preparing by a certain great Lawyer, to make the counterfeiting of Copper Coin a capital Offenfe, as the only probable Remedy for the Grievance.

By the antient Title of Baron Le Despencer becoming extinct, the Title of Permier Baron of England does not defeend to Lord Abergavenny, as mentioned in feveral of the Papers, but to the Duke of Norfolk, whose original Title of Baron Howard, of Seagrave, was created above a Year antecedent to that of Lord Abergavenny, and his Grace now unites the bonourable Distinctions of Premier Duke, Earl, and Baron of England. The Duke of Bolton is Premier Marquis, as Marquis of Winchester, and Lord Viscount Hereford enjoys the Title of Premier Viscount of England.

Lord Viscount Hereford enjoys the Title of Premier Viscount of England.

It is intended that as soon as the Queen of France can, conveniently with Court Etiquette, appear in Publick, her Majefty shall make a most solemn and splendid Entry into Paris, that the may return Thanks to Heaven in the Cattedral of that City for her lafe Delivery, and the Birth of a Son. She has already made Choice of her Drefs, a Gold Tissue, bordered all round with Pearls and Diamonds; with this Drefs he is to wear the great Crown Jewels, and ride in the magnificent State-Coach, which the King used for the first Time on the Day of his Coronation.

The great Work of cleansing the Tower Ditch continues to be carried on with unremitting Industry, and it is designed, that small Vessels all have spacious Riding round the Tower, for the greater Conveniency of taking in, or discharging Cargoes of Military and Ordnance Stores.

A confiderable Seizure of Tea, Cambrick, and other finuggled Goods, was made on Tuefday laft by a Party of Dragoons, near Long Melford, in Suffolk, after an obtinate Dispute with upwards of a Sanugglers, feveral of whom were wounded in the Scuffic.—One of the Soldiers was flightly wounded.

About Seven o'Clock on Monday Evening last, a Female Infant, about four Years old, was decoyed from the Borough to Covent-Garden, by a Woman, at prefent undifcovered, who stripped the Child of her Shift and Petticoat, and there left her. Fortunately Mr. Preffy of Henrietta-Street, discovered the Infant in this deplorable Situation, and with great Humanity brought her to his House, had her taken proper Care of, and hearing the Child mention the Borough, carried her there, in Hopes of sinding the Parents, which he foon did. Another Child from the same Neighbourhood is missing, supposed to have been taken away by a Gang of Misterants, who have for some Time past carried on this Trade with Impunity.
