LONDON, FRIDAY, OCTOBER 17.

No official account was yefterday morning brought to the French. It is flated, that the Surrender of Bois-le-Duc to the French. It is flated, that the Surrender was occasioned by a Mutiny in the Town, as the inhabitants, many of whom were in the French interest, would not inbmit to the danger and inconveniences of a Siege. The place furrendered on the 9th, and the Garricon are faid to have obtained the same terms, as that of Value insures.

Garrison are faid to have obtained the fame terms, as that of Valunciumer.

The French have croffed the Meyle, and as our Troops are flationed in cantonments to protect the Diffricts of Bosmarl and Nimegaen, an Action between them and the Enemy may be confidered as unavoidable.

By Letters from the Army we learn, that the Duke of York is fortifying and firengthening his prefent position at Nimegaen, by the confurction of new betteries, and chevance de frizze, from whence it would appear to be His Royal Highmel's intention to make a stand at Nimegaen. The Enemy, however, had not, when the lace counts came away, appeared before the place.

Letters received vesterals from Quebec contain were.

accounts came away, appeared before the place.

Letters received yeflerday from Quebec contain very important and interefiling information of an Action having taken place between a Detachment of the Militian of Upper Canada, affilied by the Indians, and Gential Waine, who commands the American Army upon that Frontier.

What may be the confequence of this event, we will not take upon us to decide. It would be futile to conceal the fact, that there is a large party in America who have for fome time wifited for a War with this Country. It remains to be feen whether they will confirm the rencontre that has taken place in Upper Canada into an actual commencement of hoftlitties.

The General had advanced with his Army, confid-

Country. It remains to be feen whether they will confirm the rencontre that has taken place in Upper Canada into an actual commencement of hoftilities.

The General had advanced with his Army, confifting of 3000 Men, to a place not many days march from Diroit, where he threw up a breaft-work, behind which he entrenched his Troops. The Militia of Deroit, attended by a body of Indians, moved forward to opoofe his progrefs, and refolutely attacked his entrenchment, from which they were twice repulled; but more the chief attempt, they were fuccessful. Seventeen of the Militia of Deroit, and fifty or fixty Indians, are fall to have been killed upon the ipot.

We have received advice, by a private Letter from Monreal, of a discovery which has been recently made of the highest importance to the Commercial World. Mr. McKenzie, a partner in the house of Frobilher. Mr. Pavilh, and Co. of Montreal, his stelly returned to Michilimakimae, after an absence of near three years, during which he has been fo fortunate as to penetrate across the Continent to the Pacific Ocean, and reach a place between King George's Hand and Northe Sound. This Gentleman, whose persevening and enterprising mind weil fuited him for such an undertaking, in his trave's through the North West Country some time ago, to establish a more extensive intercourse with the Indians, and to traffick for furs, arrived at the banks of a river which took a western direction, and which he observed to rise upwards of two feet, by the induce of the tide. In prosecuting a second expedition from Michilmakimae, after undergoing the unavoidable hardship forests where men were obliged to carry the canoes, he at length attained the utmost bounds of the Western Continent. This circumsfance will, in course of time, be of the greatest consequence to this country, as it opens a direct communication with China, and may doubtlest yet lead to surfure of with the Company had before stabilished huts as far as rooo miles.

By a letter from Edinburgh, dated the 14th inft, we learn, that Watt and Dozone were very penitent: they feemed fully fenfible of their crimes, and acknowledged the justice of their fentence.

A Reipite had reached Edinburgh for Dozonie, for one month. There was not the finallest apprehension of tunnul or disturbance on the day of Watt's execution, as it was generally understood to be the wish of the Populace that he should fuffer.

pulace that he should suffer.

They were drawn up in St. Gyles's Field, a little beyond the Radcliffe Instrument, in the Suburbs of this City, where, after the usual Salutes, they passed in Review before the General.

These Troops are exceedingly well mounted, and the Men appeared in their full new Suits of Uniform, which Elegance appears to be happily combined with Utility; but the Arms, and Part of their Furniture, have not yet been delivered out.
