this subject, we will take occasion to add one or two suggestions.

In any Wool pritions, which it is very desirable to promote and greaper periously to the needing of Parlimerat, we hope a judicious distinction will be made between the wools, such as we cannot in this country grow with advanage (tooking to the value of the mutica), and those carear Continents and foreign growths which come into direct competition with own own. Fine wools however, made as Sanon and Merico, are also lately accessary to the character of our manufactures. This is a distinction which cannot be controvered; and on the principle of "Live and tellive," Hought to be acted upons as the access to woold at the same lines materially contribute to the success of the periodic of the principle of the principl
